

## **Program Level Student Learning Outcomes**

### 1. Patient Assessment:

Students will be able to competently assess patients utilizing a health history, examination and other appropriate diagnostic procedures.

### 2. Diagnosis:

Students will be able to integrate patient assessment data and apply reasoning to solve clinical problems and arrive at a diagnosis.

### 3. Patient Care:

Students will be able to construct appropriate patient care plans, and demonstrate competence in the delivery of chiropractic care in the management of the cases typically seen in chiropractic practice.

### 4. Professional Issues:

Students will be able to provide competent and effective care in a professional and ethical manner.

### 5. Doctor-Patient Relationship:

Students will be able to communicate effectively with patients and their families, and provide care in an atmosphere of trust and confidence.
